

Allergen information

Supplier:	Angel Yeast (Egypt) Co., Ltd.	Product name:	Yeast extract KA65
Production site/ producer:	Angel Yeast (Egypt) Co., Ltd.	Material no. supplier:	KA65

1. Allergens	Recipe/ product formula = intentionally added			Cross-contact = may contain Unintended Allergen Presence (UAP) is the total of cross-contact of processes and raw materials/ supply chain ⁴					
	Used as an ingredient? ¹		Exemption/ allergen labelling not required? ²	Used on same equipment	Cross-contact possible		Quantity per type of cross-contact ⁴ in order to perform a Quantitative Risk Assessment (QRA) ⁵		Recommendations on labelling of cross-contact (PAL) eg. if UAP is not considered to be at risk? ⁶
	YES	NO	Labelling remarks	YES	YES	NO	Homogeneous (eg. powder, liquid, paste)	Particulate (eg. seeds, nuts, beans, flakes, kernels)	PAL labelling remarks
Cereals containing gluten									remark
Wheat, spelt, khorasan	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark
Rye	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark
Barley	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark
Oats	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark
Crustaceans	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark
Eggs	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark
Fish	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark
Peanuts	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark
Soybeans	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark
Milk	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark
(Tree) Nuts									remark
Almond	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark
Hazelnut	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark
Walnuts	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark
Cashews	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark
Pecan nuts	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark
Brazil nuts	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark
Pistachio nuts	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark
Macadamia nuts	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark
Celery	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark
Mustard	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark
Sesame seeds	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark
Sulphur dioxide and sulphites	☐ natural or added	☒	☐ <10 ppm ³ ☐ >10 ppm	☐	☐	☒	☐ <10 ppm ☐ >10 ppm	☐ grams, ppm sulphites	remark
Lupin	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark
Molluscs	☐ protein %	☒	remark	☐	☐	☒	☐ ppm protein	☐ grams, protein %	remark

2. Additional allergy warning statement Novel Foods Implementing Regulation (EU) 2017/2470	Used as an ingredient?		Additional allergy warning
	YES	NO	
Rapeseed/ canola protein (not applicable for canola oil, only partially defatted powders and proteins)	☐	☒	mustard
Insects (lesser and yellow mealworm, house cricket and locust)	☐	☒	crustaceans (and/ or molluscs) and dust mites
Root extract of 3 specific herbs	☐	☒	celery
Dried kenari nuts	☐	☒	hazelnut, cashew and pistachio
Dried pili nuts	☐	☒	cashew and walnut
Bambara nuts	☐	☒	peanut and soybeans

4a. Signature and authorization	
Supplier	
Name	Mr. Wang Ziling
Job title	QA
Company name	Angel Yeast (Egypt) Co., Ltd.
Telephone number	+86-717-6369888
Email address	wangziz@angelyeast.com
Date	2026-1-21
Agree on change procedure*	☒
Signature	QA: Wang Ziling

3. Allergen free-from claims			
	YES	NO	
Gluten-free	☒	☐	Explain threshold used eg. 20 ppm
Lactose-free	☒	☐	Explain threshold used eg. 100 ppm
Others (e.g. milk- or soy-free)	☐	☐	List applicable claim(s) and threshold(s) used

4b. Signature and authorization	
Purchaser/ receiving location approval	
Name	name
Job title	job title
Date	date
Signature	signature

*Change Procedure: Any changes to the supplied material such as recipe or process change, change in origin of raw materials, change in processing aids used or change in product portfolio in the production plant (risk of contamination) must be notified prior to the change.
All changes must be notified and approved in writing.

Footnotes

¹ For single ingredients provide % protein. For compound ingredients provide % protein from the allergenic source and the % of the allergenic ingredient in the products formula.

This is needed to perform a QRA (see also footnote 5) for the production processes where this product is used as an ingredient.

² Some ingredients obtained from a legal allergen may not pose a risk and do legally not require allergen labelling. In Europe those exemptions are listed in Regulation (EC) No. 1169/2011 Annex II.

³ Expressed as mg total content of SO₂ per kg product. Sulphur compounds not being sulphites (e.g. in garlic) and volatile acids/vinegar may give false positive results with the Monier Williams analyses.

The limit of 10 ppm SO₂ applies to the content in the final product after preparation. Consult the legislation of the country of sale to determine whether labelling of naturally present sulphites is required.

⁴ EU legislation (Regulation (EC) No. 852/2004) requires the prevention of cross-contact by cleaning after processing allergens. The [Commission Notice](#) explains that if this is not possible, the supplier should provide a quantification. For homogeneous cross-contact this in ppm (mg allergenic protein/ kg food). For particulates: weight particle(s) (in grams) and % allergenic protein of the particle.

⁵ A quantitative risk assessment (QRA) compares the total level of cross-contact (from processes + raw materials) with a safe limit. This safe limit, also called action limit, is calculated from a reference dose and the consumption amount of an end product. Therefore, a QRA is typically performed by the food business operator producing the final consumer product. Where raw materials are sold to customers (B2B) who may not be familiar with QRA, additional labelling recommendations for cross-contact labelling can be provided in the last column. This may be based on a QRA using assumptions about the use of the raw material in consumer end products. In this case, quantitative data will also be provided so that the approach is transparent and the assumptions can be verified.

Guidance on performing a QRA: [step-by-step approach](#) and [guidance document The Netherlands](#).

⁶ Precautionary Allergen Labelling (PAL) is the labelling of cross-contact allergens in a separate statement, for example "may contain almond". There is no European legislation for this type of labelling, but some Member States have national legislation, such as the Netherlands, or interpretation/ guidance documents.
